# THE CLINIC

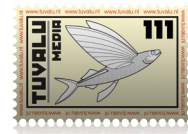

\_\_\_\_\_

Prime access drama with record-breaking ratings! True stories from a hospital clinic deliver moving drama, gripping emotions and compelling characters.

Featuring patient case-histories seen through the eyes of five doctors and one nurse, The Clinic provides two intriguing stories per episode.

Cases range from serious to mysterious and are occasionally comical. But all of them are taken from real life and whatever the diagnosis for each patient is, the series takes the audience into the minds and hearts of the characters. We share their worries and sadness as well as their relief, understanding and sometimes even joy. All kinds of people visit The Clinic for all kinds of reasons and our doctors and audience are privileged to be part of some intense moments in the lives of the featured characters.

Each thoroughly researched medical case is scripted and filmed and then the actual combination of storylines is done at the editing stage, making this high impact drama achievable in a very cost effective way.
