Like good soldiers in a war zone, hospital staff are expected to respect the chain of command when dealing with life and death situations. But what happens when smug doctors, arrogant surgeons and out of touch administrators make that easier said than done?

Nurses deals with the professional and personal lives of four female colleagues who cope in different ways with the challenges of life on the trauma ward. With determination, strength and a black sense of humor they achieve the weird, challenging and amazing task of saving lives in a system that sometimes seems designed to do the opposite.

With addictive serial storylines plus surprising cases of the week, Nurses is prime time medical drama showing life in a hospital as you have not seen it before.
